

**FOR IMMEDIATE RELEASE:****July 2019 • Louisville, KY – Winston Foodservice Launches New CVap® Product Line**

Winston Foodservice just released a redesigned CVap® product line. The new line features aesthetic upgrades, along with improvements in the electronics, programming, and functionality. An upgrade from the company's legacy CVap product line, the new line is still powered by Winston's patented Controlled Vapor Technology (CVap), which gives the operator unparalleled control over food quality when cooking, holding, or retherming food products. Notable features for the new product line include a USB/Audio Port, Capacitive Touch (C-Touch) Wheel control, integrated food temperature probe and CVap® Programming App compatible, which enables the user to program equipment by waving an Android phone near the control sensor and "bump" settings to the equipment.

"Other equipment heats air. Equipment with CVap Technology is designed to heat food, with unmatched precision and versatility," said Shaun Tanner, General Manager of the Foodservice Division. "Couple that with the enhanced design aesthetic and improved ease of use, and you've got a beast any operator will be happy to add to their kitchen lineup."

The new CVap line includes holding cabinets, cook and hold ovens, and retherm ovens in various sizes and capabilities.

About Winston Foodservice

A lot of companies will tell you they "think outside the box." But that's not us – we never actually fit in the box to begin with. We've always enjoyed the position of being just a little different in our approach.

Winston Foodservice is a division of Winston Industries, LLC. Founder Winston Shelton left General Electric years ago because of his entrepreneurial spirit and the need to create something. He created a pressure fryer and the ability to franchise a system. He also designed a whole new class of hot holding equipment copied by others.

The Foodservice Division is an international manufacturer and distributor of commercial foodservice equipment, and its family of brands includes Collectramatic® fryers and CVap® holding, cooking, and retherming equipment. The Winston family of divisions includes Foodservice, Electronics, Manufacturing, and Ventures. For more information visit www.winstonfoodservice.com.
