Short Form Specs

Winston CVap Holding Cabinet, model HA4003 with electronic A-Series differential control to provide precise food temperature from 90° to 180°F (32° to 82°C) and maintain food texture with settings labeled proof, very moist, firm moist, and crisp. Utilizes Controlled Vapor Technology (patent #5,494,690) as a method and apparatus for holding hot foods, consisting of an air heater and water heater to establish ideal water vapor content that is in relation with the moistness characteristics of the food. Uniflo airflow design provides even heat distribution.

CONTROLLED VAPOR TECHNOLOGY (U.S. patent #5,494,690) establishes that the water vapor content in the cabinet is the same as that of the food. This unique process controls moisture evaporation and saturation, so crisp foods stay crisp, and moist foods stay moist.

EASY-TO-USE CONTROLS electronic differential controls are easy to understand and reliable. Never requires field calibration.

FOOD TEMP DIAL allows precise control of food temperature from 90 to 180°F (32 to 82°C).

FOOD TEXTURE DIAL maintains just-cooked texture with settings labeled proof, very moist, firm moist, and crisp. No guesswork required.

BUILT TO LAST WITH QUALITY CRAFTSMANSHIP, high grade stainless steel construction, and full insulation on top, sides, and doors. Compact to fit under counters, to save floor space. Features full perimeter door gaskets, magnetic door handles, lift-off doors, removable side racks and digital readout for water temperature.

ALLOWS FOR BETTER CONTROL OF FOOD QUALITY, hold your menu items at just-cooked quality and precise serving temperatures for extended times.
